

@ Company's Business Profile

iAlbatros Poland SA operates in Business Travel industry. We deliver reservation services (booking hotels and tickets for our Clients delegations) via our very own web and mobile applications from Self / Online Booking Tools category. From March 2017 we are a part of Sodexo Benefits & Rewards and in cooperation with our Belgian partner - Xpenditure - we are working at the package of complex Business Travel & Expenses applications.

@ Applications We Make

Our iAlbatros and MAYA are large reservation systems with user's volume reaching almost one million! These apps are developed in .NET technologies, using the newest and the most innovative web and mobile solutions. Our goal is to deliver a highly functional system with extraordinary User Experience. With our applications you can book a hotel room, get a plane or train ticket, rent a car for your business trip... and make the settlement after absolutely paperless!

Data Analyst

Warszawa

Role in the Team

If you are a true researcher, skilled in drawing right conclusions from big volumes of data, happy to turn your hand to almost anything - this job is for you! It is the first fully data science role with deep use of A/B testing, data organizing and analyzing. Being proactive and flexible, you will create reports and tools to get a good understanding of system's users behavior and provide valuable insight for the development of our products. So if you want to set up trends not follow them - join us!

Your tasks:

- developing tools for understanding engagement of thousands of users;
- designing & interpreting A/B tests and any other experiments and researches to make decisions data-driven;
- building predictive and descriptive models of user and companies behavior;
- working across the whole business and development delivering insights for the product, marketing, and analysis teams;
- engaging users and tell data stories, in scientific and in commercial contexts.

If you are...

- a bit experienced in any of area: A/B Testing, Data Analysis, Reporting, Business Analysis, Market Analysis or a graduate in computer science, math, engineering, physics or statistics;
- fluent in English (C1/C2);
- familiar with SQL and data warehouses, data modelling and preferably data cleaning (it will be an asset);
- proactive, with "DO-IT" attitude, able to work both as part of a team and on your own initiative - **apply!** :)

It's worth it!

Do you know what happens backstage while we reserve a hotel or a flight?

At iAlbatros you can experience the Travel Industry from the very inside :)

- ✓ technological & branch knowledge
- ✓ English & French lessons
- ✓ flexible working time
- ✓ tech trainings & IT events
- ✓ professional development
- ✓ benefits package

...and, above all, everyday „sparing partners” for creative, intellectual debates :)
